Education

VI Postgraduate Expert in Reverse Engineering and Malware Intelligence — *Málaga, Spain*
Google Safety Engineering Center (GSEC) — *October 2024 - December 2024*
Fundamentals of cybersecurity, static and dynamic application-level analysis, automated analysis environments, code-level analysis, and techniques for identification and detection.

Bachelor's Degree in Computer Science - Graduated — *Málaga, Spain*
University of Málaga — *September 2019 - June 2024*
- Participated in an international exchange program (Erasmus) at Universidade Federal Fluminense, *Rio de Janeiro (Brazil)*.

Bachelor's Degree in Mathematics - Undergraduate (In Progress) — *Málaga, Spain*
University of Málaga — *September 2019 - June 2025*
- Participated in an international exchange program (Erasmus) at Universidade Federal Fluminense, *Rio de Janeiro (Brazil)*.

Skills

Mathematics	Mathematical Analysis, Algebra, Probability & Statistics, Statistical Inference, Numerical Methods, Optimization
Front-end	React, HTML5, CSS, JavaScript
Programming	Python *(NumPy, Matplotlib, PyAutoGUI, Optimize, DEAP, PyTorch)*, Java, Apex, C, C++, R, Scala
Others	Linux (Ubuntu), Salesforce, Git, Bitbucket, Jira, Tableau, Power Bi, Excel, SCRUM, Docker, Kubernetes, Unit Testing
Databases	Oracle SQL, MySQL, MariaDB
Languages	English *(Upper Intermediate)*, Spanish *(Native)*, Portuguese *(Upper Intermediate)*
Soft Skills	Problem Solving, Self-learning, Leadership, Critical Thinking, Team Collaboration

Work Experience

Freepik — *Málaga, Spain*
Salesforce Developer Internship — *June 2023 - March 2024*
- Development of Lightning Web Components, such as account indicators with child accounts, integration with Slack and Jira, search features, modals, and more.
- Integration of Salesforce with Jira, development of components for synchronization and comments via HTTP/webhooks.
- API management and deployment using Google Cloud Platform (GCP) to enhance reliability and scalability of key services.
- Implementation of methods to support the internal API, leveraging cloud-based solutions to optimize performance.
- Creation of flows, custom objects, and fields.Creation of reports and dashboards.
- Implementation of GitHub Actions pipelines to automate deployment processes for Salesforce in production environments.
- Implementation of comprehensive unit tests for each Apex controller, following best practices.
- Improvement of efficiency and optimization of the company's support website, allowing for more accurate results.

Honors & Awards

Education

2019	**Finalist**, Real Maestranza de Ronda - Hights Honors	*Ronda, Spain*
2024	**Finalist**, 2024 Airzone Awards for the Best Architecture or Efficient Engineering Final Degree Project	*Málaga, Spain*
2024	**Finalist**, 2024 MONDRAGON Bachelor's and Master's Thesis Award	*Bilbao, Spain*
2024	**Distinction**, Highest Honors in Bachelor's Thesis in Computer Science	*Málaga, Spain*

Projects

Implementation of Artificial Intelligence Models for Optimizing Energy Self-Consumption and Minimizing Grid Discharges
Bachelor's Thesis in Computer Science
- Implementation of dynamic coefficients in shared solar energy self-consumption communities.
- Data analysis of users in Ireland to assess the impact of these coefficients on different user profiles and larger samples.
- Development of a custom optimization model to initialize the SLSQP algorithm from Python's minimize library.
- Use of optimization models and data analysis in Python.

Development of a Machine Learning System for People Recognition
People Recognition Project
- Designed and implemented a machine learning system capable of recognizing individuals from images and videos.
- Utilized advanced computer vision techniques and deep learning models to improve accuracy and performance.
- Developed the project using Python, leveraging libraries such as TensorFlow and OpenCV.
- Conducted extensive testing and validation to ensure robustness and reliability in various conditions.
