## Education

### Google Safety Engineering Center (GSEC)

Málaga, Spain

VI POSTGRADUATE EXPERT IN REVERSE ENGINEERING AND MALWARE INTELLIGENCE

October 2024 - December 2024

Fundamentals of cybersecurity, static and dynamic application-level analysis, automated analysis environments, code-level analysis, and techniques for identification and detection.

### University of Málaga

Málaga, Spain

BACHELOR'S DEGREE IN COMPUTER SCIENCE

September 2019 - June 2024

- Studied at Universidade Federal Fluminense, *Rio de Janeiro (Brazil)* as part of the program.

### University of Málaga

Málaga, Spain

BACHELOR'S DEGREE IN MATHEMATICS

Septembre 2019 - June 2025

- Studied at Universidade Federal Fluminense, *Rio de Janeiro (Brazil)* as part of the program.

## Skills

### Mathematics

Mathematical Analysis, Algebra, Probability and Statistical Inference, Numerical Methods, Optimization

### Front-end

React, HTML5, CSS, JavaScript

### Programming

Python (*numpy, matplotlib, pyautogui, optimize, deap, pytorch*), Java, Apex, C, C++, R, SCALA

### Others

Linux, Salesforce, Git, Bitbucket, Jira, Tableau, Power Bi, Excel, SCRUM, Docker, Kubernetes

### Databases

MySQL, OracleSQL, MariaDB

### Languages

English (*Upper Intermediate*), Spanish (*Native*), Portuguese (*Upper Intermediate*)

### Soft Skill

Problem Solving, Self-learning, Leadership, Critical Thinking, Team Collaboration

## Work Experience

### Freepik

Málaga, Spain

SALESFORCE DEVELOPER

June 2023 - March 2024

- Development of Lightning Web Components, such as account indicators with child accounts, integration with Slack and Jira, search features, modals, and more.
- Integration of Salesforce with Jira, development of components for synchronization and comments via HTTP/webhooks.
- Implementation of methods to support the internal API.
- Creation of flows, custom objects, and fields.
- Creation of reports and dashboards.
- Implementation of comprehensive unit tests for each Apex controller, following best practices.
- Improvement of efficiency and optimization of the company's support website, allowing for more accurate results.

## Honors & Awards

### EDUCATION

2019 **Finalist**, Real Maestranza de Ronda - Hights Honors

Ronda, Spain

2024 **Finalist**, 2024 Airzone Awards for the Best Architecture or Efficient Engineering Final Degree Project

Málaga, Spain

2024 **Finalist**, 2024 MONDRAGON Bachelor's and Master's Thesis Award

Bilbao, Spain

## Projects

### Implementation of Artificial Intelligence Models for Optimizing Energy Self-Consumption and Minimizing Grid Discharges

BACHELOR'S THESIS IN COMPUTER SCIENCE

- Implementation of dynamic coefficients in shared solar energy self-consumption communities.
- Data analysis of users in Ireland to assess the impact of these coefficients on different user profiles and larger samples.
- Development of a custom optimization model to initialize the SLSQP algorithm from Python's minimize library.
- Use of optimization models and data analysis in Python.

### Development of a Machine Learning System for People Recognition

PEOPLE RECOGNITION PROJECT

- Designed and implemented a machine learning system capable of recognizing individuals from images and videos.
- Utilized advanced computer vision techniques and deep learning models to improve accuracy and performance.
- Developed the project using Python, leveraging libraries such as TensorFlow and OpenCV.
- Conducted extensive testing and validation to ensure robustness and reliability in various conditions.
